In the Specification:

Please delete the heading at page 1, above line 1.

Please add a new heading at page 1, above line 1, as follows:

TITLE OF THE INVENTION

Please add a new heading at page 1, above line 2, as follows:

FIELD OF THE INVENTION

Please replace the paragraph at page 1, lines 2 to 5, with a replacement paragraph amended as follows:

The invention relates to a turbomachine or turbo-engine, particularly a gas turbine, ~~according to the preamble of patent claim 1. The invention~~ and further relates to a mounting device for a turbo-engine.

Please add a new heading at page 1, above line 6, as follows:

BACKGROUND INFORMATION

Please add a new heading at page 2, above line 16, as follows:

SUMMARY OF THE INVENTION

Please replace the paragraph at page 2, line 18 to page 3, line 2, with a replacement paragraph amended as follows:

This problem is solved in that a turbo-engine mentioned above is further developed ~~by the characteristic features~~

~~of the characterizing portion of patent claim 1. According~~  
according to the invention, wherein the guide pins extend approximately perpendicularly to the housing whereby guide pin ends extending into the housing engage fork-shaped elements allocated to the radially outwardly positioned ends of the guide vane rings. The guide pins may extend approximately perpendicularly to the housing, but especially extend ~~[[and]]~~ at a slant relative to the radial direction and relative to the axial direction of the turbo-engine.

Please replace the paragraph at page 4, lines 7 to 8, with a replacement paragraph amended as follows:

The mounting device according to the invention is defined in patent claim 13. for aligning or adjusting the guide pins, and includes a plate-shaped base body and at least two recesses integrated into the plate-shaped base body, whereby for the alignment or adjustment of at least two of the guide pins, the guide pin ends reaching into the housing extend respectively into a corresponding recess of the mounting device positioned on the inside of the housing, and whereby the guide pins, the ends of which reach into the recesses of the mounting device, can be tightened by nuts positioned on the outside of the housing.

Please delete the paragraph at page 4, lines 9 to 10.

Please add a new heading at page 4, above line 11, as follows:

BRIEF DESCRIPTION OF THE DRAWINGS

Please add a new heading at page 5, above line 1, as follows:

DETAILED DESCRIPTION OF EXAMPLE EMBODIMENTS OF THE INVENTION
